

## What is your colour of taste?

Whatever your flavour is, you can effortlessly create a beautiful garden with the Petunia Tea® series! The variety of flavours is endless! You can mix the colours easily together or use it as an ingredient of a combi container! Plant the Tea® Petunia as part of a landscape, in a high raised pot or hang it on your balcony, fence or pergola. You will be surprised by the waterfall of flowers! In comparison our Tea® series flowers earlier as it is day length neutral. They are trailing but controlled with a mounded habit. Tea Petunia flowers until September, or in some cases, even later, which is very unique for a Petunia.

### USP's Tea® Petunia

- » Suitable for potsize 10,5 cm- hanging baskets (3 plugs) (4"- hanging baskets)
- » Suitable for packs, even in the very early season
- » An excellent garden performance
- » Weather resistance, flowers easily recover after the rain
- » Day-length neutral and early flowering
- » Compact for the grower, very continuously blooming at the consumer
